

Violence Against Women SNAPSHOT

FRANKSTON 2019

Violence against women is an urgent public health issue in Australia. It impacts victims on numerous levels: personally, socially and economically as well affecting the community at large.

Research has established that the root cause of violence against women is largely as a result of gender inequality, and the factors that continue to disadvantage women. Factors such as cultural norms, social expectations and the many inequitable economic policies that disadvantage women as well as attitudes towards women. These snapshots, therefore, not only highlight family violence rates or sexual offences incidents within each LGA but also reveal what gender inequality looks like by presenting information about caring responsibilities and income levels for men and women.

Frankston is a local government area in the Southern Metropolitan region of Victoria. The female population is 68726 (51.2 %) while the male population is 65416 (48.8 %) (ABS, 2018).
