

# Violence Against Women SNAPSHOT

# MORNINGTON PENINSULA 2019

Violence against women is an urgent public health issue in Australia. It impacts victims on numerous levels: personally, socially and economically as well affecting the community at large.

Research has established that the root cause of violence against women is largely as a result of gender inequality, and the factors that disadvantage women. Factors such as cultural norms, social expectations and the many inequitable economic policies that continue to disadvantage women as well as attitudes towards women. These snapshots, therefore, not only highlight family violence rates or sexual offences incidents within each LGA but also reveal what gender inequality looks like by presenting information about caring responsibilities and income levels for men and women.

Mornington Peninsula is a local government area in the Southern Metropolitan region of Victoria. The female population is 80122 (51.7 %) while the male population is 74875 (48.3%) (ABS, 2018).
